### 株式購買者への大注意!!

三つの選擇の勧め

買入時機の撰擇 [Select a Stock to Buy]  
 買入時機の撰擇 [Select a Chance to Buy]  
 證券會社の撰擇 [Select a Broker before you Buy]

### 說明

一、現代世界文明を齎した最大の要素は投資精神の發達にあるといひ、株式所有が投資の道に於て最も確實で信頼すべき方法なることは既に御承知の筈です、處が如何なる株式を買入るべきかは最も注意すべき事であり、普通の人々が株式を買入れようとして、やたらと宣傳や助言などに迷はされて、飛んでもない見當違ひの株式を買入り、大きな損耗を來たす事が間々にありますから、皆さん必ず注意をして、最も有望で極めて確實な將來子孫の財産としても差支へない様な有利な株式を撰擇して買入らなければなりません、そない株式なら何時でも金の融通にもなります。

二、株式買入には第一條件として其株式會社の過去、現在の營業情態や、値段の調査及現今市場の趨勢等を取調へ適當の時期であるか否やを知るのが肝要であります、勿論株式買入には目今のやうな安い時に買入るのが當然ですが、ウツカリするご値段の高い時に買はせられ安い時に買入るやうな事がありません、いくら確實有望の株式でもそんな事をしては何にもなりません、株買入には適當なチャンスを選んで之を捕らぬのが最も必要であります。

三、愈々株式を御求めになる場合には、餅屋は餅屋で矢張り其道に経験ある最も信頼すべき證券會社に御相談の上で極めになるのが結局御得策であります、處で「どの證券會社に問合せに見やうか」とた尋ねのときは第一に

#### 當社の特典

公債券、株券等買入の有無に拘はらず當會社は出来るだけ御意様の御便宜になることを致します、お尋ねに對しては書面にて御返事申し上げ、或は直接に販賣代理員を出張為致御相談も致し申し上げます。

### Manchurian Soy Beans Extensive China Industry

MUKDEN, Manchuria, Aug. 10.—Exigencies of the political disruption between China and Russia in Manchuria have added importance to the Manchurian soy bean crop, foundation of the country's economic structure.

The harvest this year is expected to be the largest in history. Last year the output aggregated about 5,500,000 tons, approximately 75 per cent of the total soy bean production of all China. The area planted this season is something more than 8,000,000 acres.

Used in the manufacture of both food and explosives, the soy bean has a significant position in the present national emergency. The possibility of an increased industrial demand, however remote, has spurred producers to extraordinary efforts.

### "MEAT AND MILK"

Although a staple food in China for more than 4000 years, the soy bean, "meat and milk" of the Orient is one of the romances of modern science. For centuries it was made into a curd that took the place of meat and bread among the poor. A vegetable milk was pressed from the curd. It was not until 1910, when a shipment of 100 tons was sent to England, that the soy bean became a factor in international trade.

Since then scores of products have been developed. Credits for much of the almost boom-like development and prosperity of Manchuria is given to the varied uses of the soy bean. They include the manufacture of soy and other sauces, cheese, crackers, macaroni, flour, confections, glycerine, explosives, enamels, varnishes, butter and lard substitutes, diabetic foods, edible oils, salad oils illuminating and lubricating oils, water-proofing materials, linoleum, paints, soaps, celluloid, rubber substitutes, printing inks, meal for cattle, coffee substitutes, baked beans, roasted beans, infants' foods, soy bean butter and fertilizer.

Even the shell is utilized, charcoal being produced from it.

### GOOD FOR BRAINS

The latest product is known as "brain tonic". It was discovered by German scientists and developed by the Japanese in the central laboratory at Dairen. The tonic is being perfected as a medicine for under-developed children and for adults in exceptional cases. It resembles old-fashioned apple butter. So important commercially has the soy bean become that the United States has been promoting a schedule of its numerous uses. The American average has increased steadily with the bean used principally as storage crops.

To find additional varieties, some of which will flourish in northern latitudes, the Department of Agriculture has sent two specialists, P.

### VICTIMS OF AIR TRAGEDY GET HONORS

#### Seven Officers Will Be Accorded Military Funeral

Special to The Japanese American News  
TOKYO, Aug. 15.—High Posthumous honors were accorded eight army officers, four of them members of the general staff, who were killed yesterday morning when a bomber plane on which they were proceeding from Tachikawa air field to Kamigahara to attend an air maneuver crashed to earth.

The bomber, No. 107, raced up into the air to a height of 800 feet, pierced a bank of clouds, and one minute later plunged to earth, effecting three somersaults on the way. While no definite cause of the accident is ascertainable, it is believed that the pilot had swung the plane suddenly to the side to evade the cloud, when he lost control through the momentum of the swerving.

The pilot is one of the best in the army. An investigation has been ordered.

Lieutenant Colonel Fukuyama, a member of the general staff, was seriously injured by this mishap and died last night at nine o'clock. Common soldiers offered blood transfusion in an effort to save his life, but the operation was of no avail.

Maj. General Ogawa was accorded the posthumous honor of the second degree merit of the Order of the Rising Sun by His Imperial Majesty the Emperor. He was further honored with a promotion to the rank of lieutenant general. A cash award of 8,000 yen goes to his surviving family.

Similar honors were accorded to other victims of the crash. Major Abe was promoted to lieutenant colonel and conferred the third degree of the Order of the Rising Sun and a cash award of 4,000 yen. Major Fukuyama was made lieutenant colonel and given the fifth order of the Rising Sun and 6,000 yen. Captain Yamamoto, pilot, and Lieutenant Cho both received 10,000 yen.

An army funeral will be held for these officers at the Kaikosa, the Army Club in Tokyo, on either August 17 or 18.

unfurled a scroll of the Sutra, the Japanese Bible and fastened it to a tree. The two priests then chanted and gave the fifth order of the "Prayer of Eternal Life," speaking it once to each direction of the compass.

"We pray for eternal peace of all soldiers who have died, and that war may never be repeated on this earth," explained the Archbishop at the conclusion of the service.

### JAPAN ZEALOUSLY GUARDS HER RIGHTS IN MANCHURIA

MUKDEN, Aug. 13.—That Japan's perpetual disorder and tribal strife. Any claim of China's that Manchuria was part of her territory always met with challenge.

Under the Manchurian ruler, the region was kept apart from China as a sort of crown land, a living place reserved for the favored Manchurian guardsmen. No Chinese were allowed. Even toward the end of the Manchurian regime, after many immigrants had filtered in, Manchuria remained, as it always had been, mostly uncultivated and without development of more than an infinitesimal part of its marvelous resources.

ENDANGERS EXISTENCE  
When Japan found that the situation "before which China remained indifferent" endangered her very existence as an independent nation, Matsuoka continued, she had to go to war with Russia.

The coming of Japan into this country, as guardian and guarantor of peace in the Far East, brought many significant changes. The integrity of the territory was assured. Railways were opened for traffic. Capital was brought in. Industrial enterprises began to spring up. The population of the country increased rapidly.

MATTER OF OPINION  
Would Japan fight China, were China to attempt to oust her from her special position in Manchuria? That, of course, is a matter of opinion. My guess is that she would—at the drop of the hat. As stated in the beginning, Japan only recently warned the Chinese government that no fighting in Manchuria would seem absurd enough.

### S. F. Lotus Girls Hold Exhibit of Art, Needlecraft

The girls of the local Lotus Club under the able supervision of Miss Ruby Fujita, exhibited an excellent collection of design work and needlecraft at an exhibit held Saturday at their clubroom in the Buddhist Temple on Pine Street.

Colorful border designs for handkerchiefs, decorations on silk wears, and geometric beading were some of the great variety of art and needle work on display. Each specimen testified to the dexterous workmanship of the girls.

These specimens were made by members of the Lotus Blossom Club sewing class. They spent their vacation days in this useful pursuit of needlecraft knowledge. The class is open to any girl who wishes to enroll. Following the exhibit Saturday, the visitors were served refreshments by the girls.

"I don't mean to talk big, but I have an expert's opinion on the subject," said Home Minister Adachi, adding that he wanted to realize his long cherished plan of improvement, taking advantage of his having been installed in a position to do it.

"People in the slum quarters of Osaka and Kobe live very much cleaner than the Tokyoans. When I visited a representative slum in Kobe some years ago, I found that the small houses were in very good order, and there was no sign of characteristic disorder.

The Home Minister is of opinion that conditions at Mikawashima are about the worst, and that it will be improved first of all.
