FILIPINO BAN IS URGED ON WASHINGTON

McClatchy Urges Immediate Action On Congress

Special to the Japanese American News WASHINGTON, April 11—A proposal to exclude Filipinos from this country probably will be offered as an amendment to immigration legislation now pending before Congress.

This was indicated today by members of the House immigration committee holding hearings on Philippine exclusion. Rep. Arthur Free of California says he may offer such an amendment, and Chairman Albert Johnson, author of the bill restricting immigration from the western hemisphere, which the committee has reported, will accept it, he indicates.

If Filipinos are not excluded, the United States may be lost to the white race as Hawaii has been, the committee has been warned by V. S. McClatchy of the California joint immigration committee.

Two-thirds of the population of Hawaii is now Asiatic, McClatchy said, and only 6 1/2 per cent of the population is white.

"The United States is the only English speaking nation on the face of the earth that does not protect itself against the colored races," McClatchy said, urging immediate action by Congress.

"It is the only nation in the world which does not protect its workers against the unemployed of other countries."

"I don't want you to think California is coming to you as a beggar in this matter. California is the border state in this war of peaceful penetration, which is more serious than an armed invasion could be."

Free told the committee he has received an appeal from the Salinas valley for aid from the Department of Justice during the coming agricultural season, for protection from possible striking and rioting.

McClatchy told the committee that cheap labor is not necessary to harvest California's crops.

Atty. Gen. U. S. Webb was to appear today to discuss legal aspects of Philippine exclusion.

Wakasugi declared that he has not yet received any intimation of his appointment from the Foreign Office in Tokyo.

"I do not think I will get the announcement until after the London Conference," declared Wakasugi, "because I am at present engaged as a member of the intelligence committee of the Japanese delegation to this party."

"I am more than happy to take up the post in San Francisco. I have had experience in both Los Angeles and Portland, and I shall devote my entire attention to the welfare of the Japanese residents on the Coast."

SAINTS IN THE ROUGH

By GLENN FRANK

The gifted C. E. Montague was writing about the great opportunity that came to the religious leaders of the soldiers during the world war.

"The men came into their hands," he said, "at the time of most drastic experience in most of the men's lives, immersed in a new strange life of sensations at once simple and intense, shaken roughly out of the world of mechanical habit which at most times puts a kind of barrier between one's mind and truth, living always among swiftly dying friends and knowing their own death at any time to be as probable as any one's. To get rid of your phlegm, it was said, is to be a philosopher. It is also to be a saint, at least in the rough; you have broken the frozen ground; you can see the greatest things in the smallest, so the morning of the first day and a spoonful of rum and a biscuit a sacrament."

The challenge that modern war, according to Mr. Montague, presents to spiritual leadership offers, I think, a fruitful allegory of the challenge that modern science is now presenting to the spiritual leadership of our time.

Let me point the allegory.

The explosive power of new ideas and the distant rumble of new doubts sired by science are stirring men to their depths as the roar and destruction of war stirred men to their depths.

Science, like war, is immersing men in a new and strange life of experiences that are intense if not simple.

Science, like war, is breaking the frozen ground of men's traditional complacencies.

Science, like war, is shaking men roughly out of the world of mechanical habit.

FAITH AND RACE PRESTIGE

By REV. FRANCIS K. ENDO

own land to be called a nation. But so far as their actual power is concerned, there exists no people on the earth whose power can be favorably compared with that of the Jews. It is told that the total population of Jews scattering all over the world is about 13 to 14 million, which is scarcely larger than that of the Koreans. However, in the past and at present, the Jews produced many famous statesmen, scholars, inventors, artists and men of wealth. Dr. Ozyab says that if 150,000 Jews were expelled from the city of London the latter will be literally a desolated city. He also says that in 1921, in the city of New York alone there were 500 lawyers, 600 physicians, 500 dentists, 1,000 druggists, 70,000 engineers and mechanics and 100 millionaires. And it is also told that the annual income of either Rothchild or Vanderbilt family is several times larger than the annual income of the Japanese Government. It was reported in May, 1929, that the Jews of America have contributed during the last fifteen years more than \$100,000,000 for their co-religionists over seas.

Thus the Jews are the wealth of the world. But they have been exiled for more than twenty-five centuries, and their history has been a history of hatred and persecution. What is the secret of this race that, in spite of great handicaps, they prospered so much as that? The Bible gives an answer to this question and says:

"No, Jehovah said to Abram, Get thee out of thy country, . . . unto the land that I will show thee; and I will make of thee a great nation, and I will bless thee, and make thy name great; and be thou a blessing; and I will bless them that bless thee, and him that curseth thee will I curse; and in thee shall all the families of the earth be blessed."

Kanagafuchi Spinners In Kobe Hurl Defi Against Wage Cut

Special to the Japanese American News TOKYO, April 11—Japan today faced a disastrous industrial war that may cause a walk of nearly 30,000 people employed by the great Kanagafuchi mills, the largest spinning syndicate in the Far East.

Already the branch mills in Osaka, Tokyo and Kobe, employing all told some eight thousand people, have struck.

The Tokyo Stock Exchange, reflecting the economic disturbance brought about by the walk-out, was forced to close today. Business was suspended 20 minutes after the exchange was opened this morning.

At 1 p. m. the exchange attempted to open again, but when a selling stampede was threatened it closed for the day.

SUDDEN DROP

The stocks of the exchange, valued normally at 125 yen, crashed to the 90 yen level overnight. The stocks of the Kanagafuchi mills likewise experienced a sudden falling off of value.

The Kanagafuchi mill workers at Kobe, angered by the decision of the operators to make a drastic reduction of wages, made the following three demands:

1. Annulment of the statement that the company will make a drastic reduction of wages.
2. Inclusion of the war-time special wage into the regular schedule.
3. Promise that wages will not be reduced in the future.

The identical demands were made by the workers at other branch mills. Besides Osaka, Tokyo and Kobe, smaller branch mills are taking on the influence of the agitators and threaten to walk-out.
