PLAY GIVEN TO OBSERVE BUDDHA DAY

Buddhists Give Good Presentation of Japan Tragedy

A historic Japanese drama, "Yoshitsune Senbonakura," portraying scenes in the life of a great Japanese soldier of ancient Japan, was presented with good stellar acting Sunday evening at the local Buddhist temple as part of the celebration of the birthday of Buddha. The play, directed by M. Mito, was enacted by three young players, including Shimizu Matsumura, Hiroko Fujita, and Tomiye Hayashi, assisted by three others.

Another highlight was the Hakata comedy in two acts, presented with much humor.

Country Dance
"Dojo Sutra" Japanese country dance, was the source of much laughter as presented with grace and wit by a group of women dancers.

There were many entertaining numbers in addition, including sword dances, folk songs, piano solos, humorous recitations, and odors.

A dramatic episode taken from the famous Japanese novel, "Gold Demon," was presented with rare skill and force by a group of Buddhist young people. The scene where Kanichi and Omiya quarrel on the beach of Atami provoked much applause from the audience.

Full House
The Buddhist hall was packed with audience, and many were turned away for lack of space.

The Buddhist people commemorated the Buddha's birthday with impressive ceremonies in the afternoon of the same day during which leading Japanese residents of the Bay area delivered eloquent tributes to the great religious leader and saint.

QUIZ SHOWS 10 BOMBING PLANES CAN CRUSH OSAKA

[Special to Japanese American News] OSAKA, Apr. 11—Ten bombing planes with two tons of incendiary bombs are more than sufficient to burn the entire city of Osaka—the heart of Japan's economic activity—into a modern Pompeii in a few hours!

Such is the warning just issued by Mr. Tanaka, architectural expert attached to the Osaka Prefectural government, who has completed minute investigation as to Osaka's strength against a possible air raid.

According to his investigation, the area covered by buildings in Osaka aggregates 25,000,000 square feet or roughly 20,416 acres, the greater part of which is occupied by wooden structures.

Assuming that the defensive strength of the anti-aircraft guns and planes of Osaka is 90 percent efficient, Osaka is still helpless before 10 flying machines.

The fire engines possessed by the city, even including those cars, do not exceed 84. This number would be barely sufficient to extinguish fires that break out at more than seven or eight places at the same time.

Judging by the fact that the fires that occurred at 80 odd different places in Tokyo at the time of the great Kanto seismic catastrophe of 1923 destroyed the greater part of the city's buildings, the invasion here of Osaka by the incendiary planes in a few hours, the investigator points out.

New York Well Protected
Having tall buildings of fire proof ferro-concrete, New York is almost impregnable against an air raid, he added.

At the minimum 5,000 bombing planes would be needed to destroy only the buildings in Manhattan with a total area of 14,209 acres, which is only six per cent of New York.

Even at the conservative estimation that Manhattan's anti-air raid equipment is 50 per cent efficient, 10,000 first class bombing planes would be required to demolish the borough, which is beyond the bounds of practical possibility.

Alliance Between U.S., Reds Against Japanese is Hinted

MOSCOW, Apr. 11—(UP)—A possible alliance between the United States and the Soviets against Japan was hinted at in the Soviet press today while political and commercial leaders discussed likelihood of a meeting between Secretary of State Stimson and Foreign Commissar Litvinoff at Geneva.

It was pointed out that the question of a Soviet-American trade agreement has been raised repeatedly.

Carl Radek, Soviet journalist, warned that Russia would unmistakably ward Japan in an article in Izvestia that Japanese attack on the Soviets would force a Soviet-American alliance which inevitably would defeat Japan.

"If challenged, the Soviets will have the right to seek temporary allies among capitalist powers which, at the present stage, do not infringe on Soviet frontiers and interests," Radek said. He implied that the United States would be this natural ally.

Another tottering mark is the circus throw. G. Nakano of Sacramento to heaved the platter almost 99 ft. last year to make a new record.

George Morishita, Shows weight man, has tossed the saucer over a 100 feet many times but last year he could not unwork a throw that did him justice.

The 440 yard mark of 55-9-10 seconds set by B. Fukushima, Visalia sprinter, is comparatively slow time for that event. It seems that the Visalia flyer has done better time than that many times himself.

FROM THE NEWS PRESS BOX

By FRANKLYN SUGIYAMA
Hence, with so much interest aroused in track, the close competition will necessarily doom a number of the present records.

Many Marks Will Fall
One of the marks that should be broken is the present J. A. A. U. high jump record of 5 feet 7 1/2 inches held by B. Fukushima, Visalia's leading star. Indeed, it would not be surprising if the young man himself puts his own record in danger for he shows indication of being in shape by having cleared 5 feet 5 inches Sunday at the Fresno Olympics.

But Zenchu Kambara, Nisei mauler, who has cleared 5 feet 10 inches in prep school, may eclipse Fukushima's mark. Last year it is said that he tried himself out before the high jumps by entering too many events, consequently he was not at his best.

When Kambara is right, he can jump.
